

AMIDACARE

FORMULARY

AMIDA CARE FORMULARY

The Amida Care formulary divides drugs into four general categories. No copayment will be applied to medications or medical supplies that are categorized as preferred on the Amida Care formulary. A \$3.00 copayment will be applied to medications or medical supplies that are categorized as non-preferred. A pharmacy cannot refuse to dispense a medication to an Amida Care member if that member cannot pay their copayment at the point of service. Category classifications are described as follows:

- 1) **Preferred Drugs**- do not require a Prior Authorization and will be dispensed at the Point of Service with dispensing contingent upon availability, validity of prescription, eligibility of member and appropriateness of care.
- 2) **Preferred Drugs that require a PA**- requires a Prior Authorization. These drugs are preferred, but will not be dispensed unless the prescriber establishes medical necessity as determined by plan prior to dispensing. Upon receipt of the PA, the drug can be dispensed to a member contingent upon availability, validity of the prescription, eligibility of the member and appropriateness of care.
- 3) **Non-Preferred Drugs**- these drugs are not preferred by Amida Care for prescribing or dispensing and will not be dispensed at the Point of Service. Prescribers who wish to prescribe these medications must contact Express Scripts in order to present, document and establish medical necessity.
- 4) **Step Therapy Drugs**- these drugs will be dispensed at the Point of Service if a similar drug or drug in the same drug class has been used within the last 90 days from the date of service, and the member did not have an appropriate or sufficient clinical response to the drug. A provider can obtain a Prior Authorization for drugs listed in this category to be dispensed if it is determined that it is medically necessary for the patient to receive the medication and Step Therapy is inappropriate based on the patient's medical history.

Prior Authorization

The Prior Authorization process is a utilization management tool that ensures appropriate prescribing based on current medical guidelines and regulations. Medications that require a PA must be deemed medically necessary and prescribers must adhere to FDA approved indications and dosing unless off label use is determined to be medically necessary.

Prior Authorization Attainment

- 1) Contact Express Scripts for a Prior Authorization AFTER the patient has dropped the prescription off at the pharmacy
- 2) Contact Express Scripts for a Prior Authorization BEFORE the patient has dropped the prescription off at the pharmacy

A provider can call Express Scripts at 800.417.8164 or fax a completed Prior Authorization form to 800.357.9577.

The necessary, member specific information must be available so that the request can be processed. The Express Scripts website, <http://www.express-scripts.com/services/physicians/pa/#P>, the Amida Care Website and Epocrates® desktop and mobile platforms have a listing of medications that commonly require a Prior Authorization.

Additionally, the Amida Care website and the Express Scripts website have forms available that can be filled out and faxed to Express Scripts in order to complete the PA process. Using these forms, a provider can fill out the information and fax it to Express Scripts prior to the member submitting the prescription at the pharmacy or after the prescription has been submitted for processing at the pharmacy. A general form can be filled out in order to obtain Prior Authorization for medications that are not specifically listed on the website.

A provider can call Express Scripts, 24 hours/day in order to obtain a Prior Authorization for any medication.

Be aware that if the fax option is used and all necessary information is not provided on the form, this can lead to delays in processing and ultimate approval or denial.

Medications Subject to Quantity Level Limitations (QLL)

These limitations and are based on the manufacturer's recommended dosage and duration of therapy; common usage for episodic or intermittent treatment; FDA-approved recommendations and/or clinical studies; and/or as determined by Amida Care.

LEGEND

- Boldface:** Generic available. Please note: Out-of-pocket costs may be higher than expected if the generic drug is not used.
- ER/XR: Extended-release (also known as sustained-release), refer to the reference brand listed for clarification.
- lowercase: generic medications
- OTC: Over the counter
- PA: Prior Authorization
- QLL: Quantity Limit
- ST: Step Therapy
- UPPERCASE: Brand Name medications
