

Adults' Access to Preventive/Ambulatory Health Services (AAP)

Measure Description

Assesses the percentage of patients 20 years of age and older who had an ambulatory or preventive care visit.

Numerator Compliance

Medicaid and Medicare: One or more ambulatory or preventive care visits during the measurement year.

- Ambulatory Visits
- Other Ambulatory Visits
- Telephone Visits
- Online Assessments

Best Practices

- ★ **Consider** offering extended practice hours to increase care access.
- ★ **Educate** patients on the importance of having at least one ambulatory or preventive care visit during each measurement year.
- ★ **Encourage** patients to maintain the relationship with a PCP to promote consistent and coordinated health care.
- ★ **Make** outreach calls and/or send letters to advise patients of the need for a visit.
- ★ **Remind** patients of their appointment by making calls or sending texts.
