

Gonorrhea Screening of Sexually Active Patients (GON)

Measure Description

The percentage of patients 18–64 years of age who were identified as sexually active and who had at least one gonorrhea test during the measurement year.

Numerator Compliance

At least one gonorrhea test during the measurement year.

Best Practices

- ★ **Utilize** annual wellness visits to conduct a complete sexual history assessment and order test.
- ★ **Screening** should also occur at any visit where oral contraceptives, sexually transmitted diseases (STD) or urinary symptoms are discussed.
- ★ **Use** phone, email, or other means to have patients come in for their routine yearly visit.
- ★ **Encourage** the patient to make an appointment for STI screening once a year (or, to keep their appointment if they indicate they already have one).
- ★ **Reschedule** no shows immediately.
