

BE COUNTED

BEING COUNTED MEANS BETTER HEALTH CARE, EDUCATION, AND SERVICES. COMPLETE THE CENSUS!

The more of us who fill out the census, the more money we get for health care, public schools, affordable housing, programs for seniors, and job training programs. You have until September 30, 2020. Complete it today!

For lack of participation in the 2010 Census, New York lost two representatives in Congress and millions of dollars in federal funding. Since COVID-19 New York City and the State have lost millions of dollars in revenue, putting in danger public services like health care, transportation and social services. We need to be counted; our future depends on it!

Census results are used to allocate seats and draw district lines for the U.S. House of Representatives, state legislatures, and local boards. They will determine how \$8 trillion annually in federal assistance is distributed to states, localities, and families. Take care of yourself, your family and community, complete the census!
