

Live Your Life Undetectable Program Provider Benefits

The Live Your Life Undetectable Program is designed to support HIV-positive participants in adhering to ARV medication regimens. The program's goal is to help each client reduce HIV viral load to an undetectable level and maintain durable viral suppression.

Clients enrolled in the Live Your Life Undetectable Program will receive integrated HIV primary care and supportive services to help them maintain adherence to ARV medication regimens.

Participants who enroll in the program with an undetectable viral load or who become undetectable (viral load of less than 200 copies/ml) through participation in the program will be given a financial incentive of \$100 for each quarter that they stay undetectable.

Amida Care believes that the financial incentive provided to the client, combined with the specific requirements of this program, will:

- *Increase and stabilize the client's connection to care and adherence to their ARV medications.*
- *Provide a greater opportunity for provider/patient communication.*
- *Increase Viral Load Suppression rates at client and clinic level.*
- *Increase QARR/HEDIS scores.*

We recognize that participation in this program brings new efforts and responsibilities for providers and clinic staff. To help offset these additional efforts, we are providing an opportunity for you to be compensated for these program-related activities.

NEW ENROLLMENT

For completing and submitting to Amida Care the full enrollment package (signed RHIO Consent Form, Health Assessment, Enrollment and Program Consent Form, and Quarterly Attestation), the Primary Care Provider can use the below CPT codes to bill, in addition to the standard visit codes, **1x per client** they enroll in the LYL Undetectable Program:
